Linus Ericsson

scholar.google.com | linus.ericsson@ed.ac.uk | linusericsson.github.io

I am a postdoctoral researcher at the University of Edinburgh, focusing on representation learning, efficient architectures and adaptation across distribution shifts. I have published work in top venues, including CVPR, NeurIPS and the IEEE Signal Processing Magazine. My other research interests include multimodal learning and responsible applications to climate and healthcare.

Work Experience

University of Edinburgh — **Edinburgh, UK**
Postdoctoral Researcher, School of Engineering — *Nov 2023 - Present*

My postdoctoral research focuses on the fundamentals of neural architectures, with a focus on model efficiency. I am also more broadly involved in projects on efficient training of large language models and hyperparameter optimisation over distributions shifts.

Supervisor: Dr Elliot J. Crowley

Work Experience Cont'd

Samsung AI Center **Cambridge, UK**
Research Scientist Intern *Sept 2022 – Feb 2023*

I worked as a research scientist intern with Professor Timothy M. Hospedales and Dr Da Li for 6 months. The project centred around unsupervised domain adaptation, with a special focus on providing reliable model selection and hyperparameter optimization in the absence of target domain labels.

Supervisor: Prof. Timothy M. Hospedales

Huawei Noah's Ark Lab **London, UK**
Research Scientist Intern *Oct 2021 - Mar 2022*

I worked as a research scientist intern with Dr Steven McDonagh and Dr Yongxin Yang for 6 months. The project centred around large-scale object detection for autonomous driving, with a special focus on improving self-supervised pre-training on autonomous driving data.

Supervisor: Dr Steven McDonagh

Computer Vision Research Group – Durham University **Durham, UK**
Research internship *2017*

I worked with Professor Toby Breckon over a summer, developing dense stereo vision and visual odometry for robotics. I also had the chance to collaborate with the Centre for Vision and Visual Cognition on a project involving Brain-Computer Interfaces as an application of deep learning.

Supervisor: Prof. Toby Breckon

Education

University of Edinburgh **Edinburgh, UK**
PhD in the Centre for Doctoral Training in Data Science *2019 - 2024*

My research focused mainly on unsupervised representation learning by exploiting the underlying structure in data rather than manual annotation. I also explored effective knowledge transfer from large-scale pre-training to application domains with limited data and compute resources, using transfer learning and domain adaptation approaches.

Supervisor: Prof. Timothy M. Hospedales

Durham University **Durham, UK**
MEng in Computer Science, First Class Honours *2014 - 2018*

MEng Project: Evaluating cross-domain and multi-task performance of deep reinforcement learning across the Atari benchmark (Presented at the Rising Stars Research Symposium 2018).

Supervisor: Prof. Magnus Bordewich

BSc Project: Composing Live Music with Neural Networks and Genetic Algorithms (Bronze Award for Best Poster for undergraduate project)

Supervisor: Dr Steven Bradley

Academic Engagement

Invited Speaker

- AutoML Seminars (2024)
- Edinburgh Vision (2024)

Courses

- Standing up for Science Workshop - Sense about Science (2024)
- Climate Change AI Virtual Summer School (2024)
- Achieving Research Impact with Social Enterprise (2024)
- IRDTA DeepLearn Summer School (2022)
- IAD: Speed Reading (2021)
- VOX: Managing Research Relationships (2019)

Reviewing

- *Conferences:* CVPR (2025), NeurIPS (2024), ICLR (2024), ICML (2023), BMVC (2024), ECCV (2024), AutoML (2023, 2024)
- *Workshops:* DMLR (*ICML*, 2023), DG (*ICML*, 2023), SSL Theory and Practice (*NeurIPS*, 2022, 2023), URCV (*BMVC*, 2022)

Memberships

- Computer Vision Foundation (CvF)
- British Machine Vision Association (BMVA)
- Institute of Electrical and Electronics Engineers (IEEE)

Awards

- Best paper award, AutoML conference (2023)
- Top 25 most downloaded articles, Signal Processing Magazine (2023 & 2024)
- Rising Stars Research Symposium, Durham University (2018)
- Best Individual Poster Prize for undergraduate project, Durham University (2017)
- Outstanding Achievement L1, Durham University (2015)

Teaching

- *Machine Learning in Signal Processing*, Tutor, University of Edinburgh (2025)
- *Computer Programming for Speech and Language Processing*, Demonstrator & Marker, University of Edinburgh (2019 & 2020)
- *Introductory Applied Machine Learning*, Tutor & Marker, University of Edinburgh (2019)
- *Machine Learning and Pattern Recognition*, Marker, University of Edinburgh (2019)
- *Introduction to Programming*, Demonstrator, Durham University (2017)
- *Theory of Computation*, Tutor, Durham University (2017)

Funding

Contract with Alan Turing Institute and the Defence Science and Technology Laboratory (Dstl) worth £6,559.
